Brief description of the Transnational cooperation:

1. Problems to be solved (justification of the need of the transnational cooperation)

In deprived rural areas a lot of people are disadvantaged, first of all because of poverty, then for lack of education, lack of perspectives, being female or still at school (without incomes). The project addresses to persons between 18 and 50 years old, able to work, willing to work, but living in an unfriendly environment, in deprived areas. Comparisons between Romanian and Polish communities should lead to better social and work policies. Other transnational communities could also be consulted in the matter. To that purpose, the members of the target group will be endowed with personal computers and IT training courses will be organized for them. It is estimated participation of about 30 persons of the target group and 2 IT trainers.

2. Objectives to be achieved

- Promotion of social inclusion, by fighting against discrimination and facilitation to the access on the labour market for disadvantaged persons
- Raising participation rate in the educational process
- Initial and continuous formation
- Applying better solutions and policies in order to increase access to the labour market
- Advice given to the governments

3. Main transnational activities (as provisionally planned, to be confirmed with partners)

- Organization of 2 bilateral (and multilateral) meetings in Romania and Poland
- Translation of the documentation resulted from the research
- Exchange of target persons, study visits in both countries
- Compared studies regarding solutions in both countries
- Development of new solutions

4. Planned outputs, deliverables, results of TNC; expected outcomes (effects)

- Case studies in both countries
- Final joint report regarding the subject of the project
- Selection of the best practice models in order to be developed in both countries
- 6- month IT training courses
- Joint report to be presented to the governments of the two countries

³ See definition by size on Europa : http://ec.europa.eu/enterprise/policies/sme/facts-figures-analysis/sme-definition/index_en.htm

Expected outcomes:

- Improvement of the human capital by raising the number of otherwise disadvantaged persons who got IT professional qualification
- Raise of the rural qualified working force
- Optimization of the professional insertion
- A new impulse given to the active working force in deprived areas
